RE: Opportunities for transfer between External and Internal study of Computing Information Systems and Creative Computing at Goldsmiths

We hope you are enjoying the experience of being a student on our programme and we would like to take this opportunity to remind you that it is possible to continue your studies as an internal student with us at Goldsmiths (subject to passing all units at all levels below that to which you wish to transfer).

You can apply now to join us in the 2nd or 3rd year and we very much encourage you to do so. We believe it is a wonderful opportunity to enjoy university life in the UK – indeed Goldsmiths is one of the most exciting campuses in the UK and is known as the “friendly college” because of the way staff and students interact with each other. We are confident that studying at Goldsmiths will help you to develop lasting international friendships and a network of contacts that could enhance your future life and career.

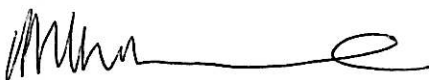

Studying in the Department of Computing will help you to develop your professional and vocational skills. You will have a good academic experience by being part of a dynamic research environment – in 2008 20% of our research was categorised as world-leading and we have secured over five million pounds in research funding.

The details of the conditions for transfer to the second year are set out on pages 16 and 17 of the Student Handbook.

If you have any queries on admissions processes please contact Goldsmiths at international-office@gold.ac.uk. If you have any questions about studying in the Department please email computing@gold.ac.uk. If you have any academic queries about correspondence of external and internal programmes, contact the Course Director for Computing External Programmes at mas01cee@gold.ac.uk.

With best wishes for your future studies,

Professor Mark d'Inverno,
Head of Department
Department of Computing
Goldsmiths, University of London
