

# Reading list 2009–10

## 02 Introduction to economics

The current edition of the subject guide is the 2005 edition. There is a supplement in 2009 to accompany the subject guide which provides updated reading references for current editions of the essential textbooks. This reading list was last updated in May 2009. Any queries about this reading list should be directed to [externalstudy@lse.ac.uk](mailto:externalstudy@lse.ac.uk).

### Essential reading

The subject guide is the best guide to the expected standards for the unit. The books below, which are referred to throughout the subject guide, **supplement** the subject guide.

From 2009 you are strongly advised to stick to **one** of the two additional textbooks below for your additional reading and to look at the other only if you find a topic difficult and find that the teaching style in the other suits you better. It is not important to read a huge amount beyond the subject guide, but **very** important to really understand what you do read.
